ABOUT SANI-99™ for AGRI

EUROPEAN APPROVED AND CERTIFIED - PCS no: 101664 (PT3, PT4)

SANI-99™ for AGRI, is broad-based and powerful disinfectant with a 99,99995% efficacy (killing rate).

Farmers are bombarded by many socio-economic challenges and the inflated prices of disinfectants, contribute to an unnecessary financial burden. Average performance disinfectant products which have low killing rates, are sold at a high price. Many products make claims which they cannot prove with physical laboratory results, but still exploit the market with exuberant prices.

Our Research & Development team ensures that our product technology is highly effective in wide range of applications. We strive to achieve a balance of 'low product cost' versus 'increase in efficacy'. We are proud to offer the Farmer a product with a high disinfection killing rate, but at a low financial cost.

SANI-99™ for AGRI is a cost saving disinfectant designed exclusively for Farmers. SANI-99™ for AGRI is only available at manufacturer's price, thus eliminating inflated prices.

Whether you buy from your Co-Op, Agent or directly from the Manufacturer, you will never pay more than the manufacturer price for this broad-based disinfectant.

SERVICES

Nationwide free delivery of SANI-99™ for AGRI to your nearest town when buying 10 or more sachets of 96g.

SANI-99™ for AGRI is sold to the Farmer at manufacturers price.

1 X SANI™-99 for AGRI [96g] makes 16 liters of powerful disinfectant.

THE PRODUCT

Our broad-based agricultural surface disinfectant SANI-99™ for AGRI, is non-poisonous and highly effective in various disinfecting applications. With proper management protocols and with the effective application of SANI-99™ for AGRI, many of the virus and bacterial challenges experienced by the Farmer, will be eliminated.

To ensure all round suppression of pathogenic spread, SANI-99™ for AGRI must be used in your complete bio-security preventative process.

SANI-99™ for AGRI is designed to be a cost saving product without compromising efficacy. Transport costs and storage space was taken into consideration when SANI-99™ for AGRI was developed. It is designed to be used in a 16L Knapsack. Please note that other package options are also available. Whatever packaging volume the Farmer require, we will do our best to satisfy your need.

Cost saving advantages when using SANI-99™ for AGRI :

- a. Price vs Efficacy.
- b. Logistics and Storage. 31 small bags of only 96g makes a half a ton (500liters) of powerful disinfectant.
- c. At 6g per liter or 96g per 16 liters it is safe for animals and humans.
- d. Livestock does not have to leave the husbandry when applying SANI-99™ for AGRI.
- e. Re-introduce livestock back into housing directly after the area has been washed and disinfected.
- f. Employees do not need PPE to use SANI-99™ for AGRI.

USES OF SANI-99™ FOR AGRI :

-  **Poultry farming:** Preventing the spread and will suppress outbreaks of Newcastle disease (ND), E. coli and Avian Influenza virus (AIV).
-  **Egg farming:** Preventing the spread and will suppress outbreaks of Salmonellosis, E. coli, Newcastle disease (ND) and Avian Influenza virus(AIV).
-  **Pig farming:** Preventing the spread and will suppress outbreaks of L. monocytogenes, Greasy Pig Disease caused by Staph, Swine Dysentery caused by E.coli and Salmonella, Swine Flu and other influenza viruses. With adequate application of SANI-99™ for AGRI, a decrease of flies and smell will be vastly reduced.

 **Cattle farming:** Preventing the spread and will suppress outbreaks of E. coli, L. monocytogenes, Foot and Mouth disease, Poxviridae.

 **Cold Storage:** Preventing the spread and will suppress outbreaks of E. coli, L. monocytogenes and Salmonella.

CHARACTERISTICS OF SANI-99™ FOR AGRI :

-  Powder format for easy transport and storage.
-  Powerful oxidant with an average ORP [oxidation reduction potential] over 7days of 1000mV. ORP is the standard measure of 'disinfectant efficacy' and 650mV is exceptional.
-  Easy to use. Just add into water, stir for 60 seconds and use.
-  Non-poisonous, non-irritating on skin or eyes, non-alcohol, non-chlorine, non-peroxide.
-  More effective than most disinfectants with a 6Log reduction at 99,99995%.
-  Kills 990 000 more pathogens in 10 seconds than 99,9% disinfectants.

CERTIFICATIONS:

 SANI-99™ for AGRI has successfully passed the following International BS and EN test protocols:

- | | |
|--|--|
| a. EN1276 | h. SANS 53697 |
| b. En13697 | i. FDA-GH-56358808 |
| c. EN14476:2013 + A2:2019 [Scotland] | j. Halaal No 1792 |
| d. BS EN 1040:2005 [Singapore] | k. Proudly South African C04137 |
| e. SANS 51276 | l. SLM/B380/M-Legionella SSP [United Kingdom] |
| f. EUROPEAN APPROVED AND CERTIFIED - PCS
no: 101664. | m. MG/PT: MG01/PT3, PT4 |

How to use SANI-99™ for AGRI:

- Add powder 96g in Knapsack filled with 16lt of water.
- Stir or shake for 60seconds.
- Pre-wash contaminated area with water, reducing organic matter influences.
- Simply spray SANI-99™ for AGRI on the contaminated areas by following these ratios:
96g = 16L to cover 160m2 highly contaminated area.
96g = 16L to cover 400m2 medium contaminated area.
96g = 16L to cover 800m2 low contaminated area.
- Leave it to dry naturally.
